FOR IMMEDIATE RELEASE

Integrity Life Sciences Resolves Inventory Backlog

Tampa, FL – February 14, 2014- Today, Integrity Life Sciences announced it has resolved the inventory backlog of critical components that impacted recent delivery schedules. Integrity's stringent quality demand requires critical components to be tested and validated prior to being accepted into inventory. With extended lead times being the initial culprit, the numerous winter storms in late 2013 and early 2014 created additional delays in receiving these components for Integrity's ISCS products. The backlog has affected both international and domestic customers for different reasons based on the regulatory requirements dictated by the country of installation. In response, Integrity has granted extended warranty concessions to customers awaiting delivery of their orders. Integrity has also put measures and processes in place to ensure that this problem does not occur in the future.

James Gibson, President and CEO, commented, "*We apologize to our customers for the inconvenience they have experienced because in 2013 we were required to reject several component deliveries. Integrity has the highest level of quality and safety policies and procedures in the medical device industry and despite the inconvenience to our customers, this proves our systems and processes work in detecting faulty components before they reach the customer.*" Mr. Gibson went on to say, "*This, combined with Integrity's outstanding sales performance in 2013, created delays and the backlog of new system installations we are currently experiencing. In addition, the onslaught of winter storms compounded the problem. We have since taken a fresh and proactive approach to our inventory replenishment redundancies with our vendors to insure this does not occur again.*" Mr. Gibson also announced that Integrity has offered all of our customers, regardless if they have been affected by this backlog or not, the opportunity to take advantage of our offer of an additional year of warranty for all orders placed in February and March." Some foreign market customers will receive additional concessions.

Integrity Life Sciences delivers a multitude of orthotic treatment options to address one of the most costly systemic ailments in the world, chronic low back and neck pain. The advanced solution begins with the ***Integrity Spinal Care System***. Integrity's medical devices are non-surgical spinal decompression therapy systems engineered to provide pain relief for compressive and degenerative conditions of the spine. Specifically, conditions that may be treated include: neck pain and back pain associated with herniated discs, protruding discs, degenerative disc disease, posterior facet syndrome, and sciatica. It achieves these effects through decompression of intervertebral discs, that is, unloading due to distraction and positioning.

Additionally, Integrity offers the very effective ***Integrity Gel Support Brace***. The ***Integrity Gel Support Brace*** is a lumbar support brace that is a fitting compliment to non-surgical spinal decompression. The ***Integrity Gel Support Brace*** was designed as an adjunct therapy for those suffering from back pain and with the back pain sufferer's needs in mind. The ***Integrity Gel Support Brace*** can be used with or without Integrity's non-surgical spinal decompression medical devices, and is an excellent treatment option for personal home use.

Team Integrity is guided by the leadership of Mr. James Gibson and a staff of managers, engineers, technicians, quality and regulatory approval professionals with a cumulative 50 plus year track record in the health care industry with specific demonstrated success in the global Non Surgical Spinal Decompression Industry. Integrity Life Sciences manufactures its products with quality and safety standards as demonstrated by its ISO 13485 registered quality system with TUV, SUD and the CE mark affixed to its product. Our FDA clearance together with compliance to global harmonized standards of both Mark CE and ISO 13485 allows Integrity Life Sciences to distribute to countries all over the world. As the owner of multiple US Patents, Integrity Life Sciences is committed to ongoing research and development in support of the worldwide healthcare community.

Prior to Integrity Life Sciences, Mr. Gibson founded Axiom Worldwide, Inc in 2001 and obtained multiple US FDA 510(k) clearances over the years. Axiom invented its flagship products, the DRX9000 True Non-surgical Spinal Decompression System and the DRX9000C, for use in medical markets around the globe. The DRX 9000 and the DRX9000 C were created to provide relief of back and neck pain and symptoms associated with herniated discs, bulging or protruding intervertebral discs, degenerative disc disease, posterior facet syndrome, and sciatica. The dedicated team at Integrity Life Sciences will continue to support legacy devices while pursuing continued medical innovations throughout the world.

Integrity Life Sciences is a privately held USA based company with international partners located across the globe with a mission of "Restoring Integrity to the Spine".
